Vinyl Graphics

Extend your message and promote your brand and sponsors on EVERY SURFACE! Walls, floors, doors, windows, elevators, etc

Double Sided Decals
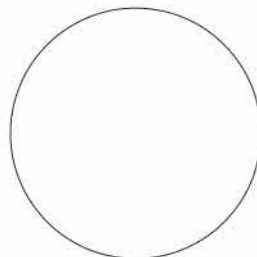

2 Part, Multi-layer Vinyl Construction

1st part is the image printed in reverse on Briteline 3442 clear vinyl, laminated with white vinyl that has a clear adhesive, and then die cut to create the reverse reading side of the decal that adheres to the glass. The 2nd part is the front side of the decal, printed to Avery MPI 2921 vinyl (grey adhesive),laminated and die cut. Both parts are aligned and mounted together using the Kala Applikator table.
Die cuts were performed with the Colex SharpCut Pro.

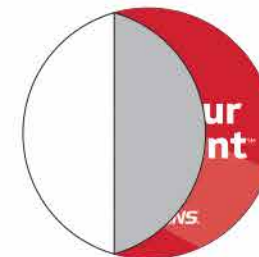

PRINT THE IMAGE IN REVERSE
TO CLEAR VINYL

LAMINATE IMAGE WITH
WHITE VINYL THAT HAS
A CLEAR ADHESIVE

DIE CUT TO CREATE
THE REVERSE PORTION
OF THE DECAL

PRINT A SECOND IMAGE FORWARD
READING TO VINYL THAT HAS
A GREY ADHESIVE, AND
