

Custom Signs & Visual Solutions for Apartments

FASTSIGNS[®]
Make Your StatementSM

Build Communities with Custom Signs and Visual Solutions

Whether you're looking to elevate your brand or start from scratch, FASTSIGNS® is ready to help. Leave the details to our experienced team of graphic designers, content developers, project managers, and installation experts as we seamlessly guide your project from concept to completion®. Make Your Statement™ with custom signs and visual solutions.

“What was great about working with FASTSIGNS was their ability to help us with creative signage as well as more practical, required signage for a lot of our projects. They helped us with things like ADA signage, wayfinding signage, but also, on the marketing side with beautiful window graphics and wall murals as well.

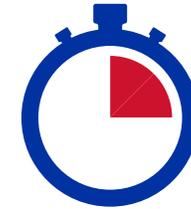

I think FASTSIGNS just has a natural desire, ability, and talent for providing a high level of customer experience, and that's due to their attention to detail, ability to really understand the client's needs. I really like FASTSIGNS being fast and making anything possible. I love the ideas they bring to the table, and it stretches us. It makes us think differently, and we like that.

I say don't hesitate to pick up the phone and call FASTSIGNS. You won't be disappointed.”

55%

of apartment renters prefer to view apartments with easily visible and well-maintained signs.

(Source: Survey by Rent.com)

The average person spends

8-10 seconds

scanning an apartment sign before deciding whether to stop and look inside.

(Source: Study by the National Apartment Association)

70%

of apartment seekers say that a well-designed sign can entice them to stop and take a closer look at an apartment complex.

Achieve More Than You Ever Thought Possible

FASTSIGNS® offers more than just signs – we offer a breadth of services at scale. Our customers trust us to provide them with the most cutting-edge products and services available on the market. Our team is made up of designers, project managers, and innovators who can handle projects of all sizes and scopes. Our consulting services help us to fully understand your business and your goals so we can customize a plan that fulfills all your needs. We have the experience, insight, and vision needed to create, manage, and implement custom signs for businesses.

Here's how it works:

1

Consultation & ordering

To get started, simply meet with a FASTSIGNS® Sales Consultant in our Design Center or at your location. If you already have artwork or a sign layout, you can send us your files via our "Upload a file" on our web page.

2

Design time

Your order then moves on to our Design Team where they'll check and pre-flight files for production quality. Once the artwork is completed, our designers will email an electronic proof to you for your review after invoice payment or approval.

3

Approve your artwork

Upon approval, our Design Team forwards your files and order to production for material preparation, to verify specification accuracy.

4

Sign production

Once the sign production is completed, your order moves to the Finishing Department where any required finishing details (grommets, hems, pole pockets, etc.) are added.

5

Quality control & packaging

Once all work is completed, the material and order are inspected for accuracy and the signs are prepared for pickup, shipping or installation.

6

Pickup > Shipping > Install

Your order is returned to your consultant for any final invoicing, and you are notified when the order is completed for pickup. If shipping or installation is requested then shipping labels are created and shippers and/or installers are scheduled.
